

2020-2021 Practical Nursing Prerequisite Courses

BIO 106 - Basic Anatomy and Physiology

Books are included in course fees.

HPR 139 - Medical Terminology (previously numbered HPR 178)

Books are included in course fees.

Practical Nursing Information

All students interested in the Practical Nursing Program should review the PN Admissions Info and PN Portfolio Checklist documents prior to registering for prerequisite courses. These documents are available at <http://www.emilygriffith.edu/practical-nursing>.

Transfer Credit Information

PN prerequisite coursework completed at Emily Griffith Technical College is not generally accepted for transfer credit at other institutions because the courses are not part of a Career and Technical Education (CTE) program.

Challenge Tests (not available during remote operations)

If you believe that you have already mastered the course content for a PN pre-req course, you may speak with an advisor about the option to pass a challenge test to meet portfolio requirements. Challenge tests are comprehensive examinations that demonstrate competence equivalent to learning achieved in a course offered by a college. Once a student begins a class, they may not take a challenge test for that class. Students may take a challenge test only one time for each course. Challenge examinations from other schools are not accepted.

Moodle

Access course materials in Moodle at <https://moodle.emilygriffith.edu>. Your username is your student ID# and your password is your student portal password (both are included on your student schedule). Classes are inactive in Moodle until the class start date. You must have confirmed payment arrangements to attend class and/or access course materials online.
